

The water requirements for the various gathering pipeline activities in the ISR are shown in:

- [Table A-1: Water Requirements for Winter Access Roads](#)
- [Table A-2: Water Requirements for ROW Travel Lanes](#)
- [Table A-3: Water Requirements for Pipeline Testing](#)
- [Table A-4: Water Requirements for the Little Chicago Infrastructure Site Camp](#)
- [Table A-5: Water Requirements for the Little Chicago Facility Site Camp](#)
- [Table A-6: Water Requirements for the Fort Good Hope Infrastructure Site Camp](#)
- [Table A-7: Water Requirements for the Norman Wells Compressor Station Camp](#)
- [Table A-8: Water Requirements for the Norman Wells Infrastructure Site Camp](#)
- [Table A-9: Water Requirements for the Little Smith Creek Infrastructure Site Camp](#)
- [Table A-10: Water Requirements for Pipeline HDD Watercourse Crossings](#)
- [Table A-11: Total Annual Water Requirements for the SSA](#)

Table A-1: Water Requirements for Winter Access Roads

Description	Water Requirements	
	Total Annual Volume (m ³)	Average Daily Volume ^a (m ³)
Winter road construction water requirements	112,400	1,873
Total water requirements over 3 years	337,200	
NOTE: ^a Average daily volume is total annual volume averaged over a 60-day winter road construction period and reflects heaviest water use early in the construction season.		

Table A-2: Water Requirements for Right-of-Way Travel Lanes

Description	Water Requirements	
	Total Annual Volume (m ³)	Average Daily ^a Volume (m ³)
Right-of-way travel lane water requirements	332,000	5,533
Total water requirements over 3 years	996,000	
NOTE: ^a Average daily volume is total annual volume averaged over a 60-day winter construction period.		

Table A-3: Water Requirements for Pipeline Testing

Description	Estimated Water Requirements	
	Total Volume (m ³)	Average Daily Volume ^a (m ³)
501.7 km of 762 mm OD (NPS 30) gas pipe	13,500	2,250
289.9 km of 273 mm OD (NPS 10) NGL pipe	Not applicable Test medium is taken from 762 mm OD test section	
Total water requirements for pressure testing	13,500	
NOTE: ^a The average daily volume is the total volume averaged over six days.		

Table A-4: Water Requirements for the Little Chicago Infrastructure Site Camp

Description	Water Requirements	
	Total Annual Volume (m ³)	Average Daily Volume ^a (m ³)
Site specific water requirements year 1	900	3
Site specific water requirements year 2	39,050	107
Site specific water requirements year 3	39,950	109
Total water requirements over 3 years	79,900	
NOTE: ^a The average daily volume is the total annual volume averaged over 365 days and reflects heaviest water use early in the construction season.		

Table A-5: Water Requirements for the Little Chicago Facility Site Camp

Description	Water Requirements	
	Total Annual Volume (m ³)	Average Daily Volume ^a (m ³)
Site specific water requirements year 1	50	1
Site specific water requirements year 2	5,500	15
Site specific water requirements year 3	5,550	15
Total water requirements over 3 years	11,100	
NOTE: ^a The average daily volume is the total annual volume averaged over 365 days.		

Table A-6: Water Requirements for the Fort Good Hope Infrastructure Site Camp

Description	Water Requirements	
	Total Annual Volume (m ³)	Average Daily Volume ^a (m ³)
Site specific water requirements year 1	900	3
Site specific water requirements year 2	39,050	107
Site specific water requirements year 3	39,950	109
Total water requirements over 3 years	79,900	
NOTE: ^a The average daily volume is the total annual volume averaged over 365 days and reflects heaviest water use early in the construction season.		

Table A-7: Water Requirements for the Norman Wells Compressor Station Camp

Description	Water Requirements	
	Total Annual Volume (m ³)	Average Daily Volume ^a (m ³)
Site specific water requirements year 1	50	1
Site specific water requirements year 2	3,500	10
Site specific water requirements year 3	3,550	10
Total water requirements over 3 years	7,100	
NOTE: ^a The average daily volume is the total annual volume averaged over 365 days.		

Table A-8: Water Requirements for the Norman Wells Infrastructure Site Camp

Description	Water Requirements	
	Total Annual Volume (m ³)	Average Daily Volume ^a (m ³)
Site specific water requirements year 1	900	3
Site specific water requirements year 2	45,700	125
Site specific water requirements year 3	46,600	128
Total water requirements over 3 years	93,200	
NOTE: ^a The average daily volume is the total annual volume averaged over 365 days and reflects heaviest water use early in the construction season.		

Table A-9: Water Requirements for the Little Smith Creek Infrastructure Site Camp

Description	Water Requirements	
	Total Annual Volume (m ³)	Average Daily Volume ^a (m ³)
Site specific water requirements year 1	600	3
Site specific water requirements year 2	27,100	74
Site specific water requirements year 3	27,700	76
Total water requirements over 3 years	55,400	
NOTE: ^a The average daily volume is the total annual volume averaged over 365 days and reflects heaviest water use early in the construction season.		

Table A-10: Water Requirements for Pipeline HDD Watercourse Crossings

Description	Estimated Water Requirements	
	Total Annual Volume (m ³)	Average Daily Volume (m ³)
SSA HDD watercourse crossings	17,600	N/A ^a
NOTE: ^a N/A – not applicable		

Table A-11: Total Annual Water Requirements for the SSA

Description	Water Requirements	
	Total Annual Volume (m ³)	Average Daily Volume ^a (m ³)
Winter road construction water requirements	112,400	1,873
Right-of-way travel lane water requirements	332,000	5,533
Pipeline testing water requirements	13,500	2,250
Little Chicago camp water requirements (maximum annual consumption)	39,950	109
Little Chicago facility camp water requirements (maximum annual consumption)	5,550	15
Fort Good Hope camp water requirements (maximum annual consumption)	39,950	109
Norman Wells facility camp water requirements (maximum annual consumption)	3,550	10
Norman Wells camp water requirements (maximum annual consumption)	46,600	128
Little Smith Creek camp water requirements (maximum annual consumption)	27,700	76
Pipeline HDD watercourse crossings	17,600	N/A ^b
Total water requirements	638,800	10,103
NOTE: ^a Total daily water requirements do not include pipeline testing water or HDD watercourse crossing water. ^b N/A – not applicable		

The Sahtu Preliminary Draft Land Use Plan, released in January 2003, identifies several proposed special management areas and conservation areas in the SSA.

Table B-1 shows the proposed land use designation of development activities.
