

# MACKENZIE GAS PROJECT: Pipeline of Opportunity

The proposed Mackenzie Gas Project is a world-class effort that represents a significant opportunity for the people and businesses of Canada's North. It's a unique project, providing opportunity for Aboriginal ownership and participation at all levels.

The partners of the Mackenzie Gas Project continue to show their commitment to the people and land of Canada's North through ongoing consultation and development of safety and environmental programs. With support and cooperation from all parties toward the success of the project, we can make this pipeline a reality.
