

## How can I use my skills and interests in the oil and gas industry?

I'm an organized person who likes to help projects go smoothly.

I could be a:

- **Community consultation coordinator** who helps organize meetings between the companies and the communities affected by the companies' activities
- **Administrative assistant** who works in a company office
- **Logistics coordinator** who ensures the materials, equipment and workers are in the right place at the right time

I like working outdoors.

I could be a:

- **Camp Manager** who makes sure the work camps run smoothly
- **Lead Hand** who coordinates the activities of a construction work crew
- **Environmental technician** who monitors impacts on the environment and checks that impacts are minimized
- **Welder** or **Welder's Helper** working on oil or gas facilities or pipeline construction
- **Surveyor** or **bush clearer** for a pipeline

Our thanks to Aurora College for contributing some of these photos.
